22 January 2020

Dear Potential Customer,

Esperance Gas Distribution Company (EGDC) is the retailer of natural gas in Esperance. It currently relies on Esperance Power Station to provide gas supply to the town of Esperance.

However, the future of Esperance Power Station is uncertain with Horizon Power indicating that from December 2021, it will move to alternative power generation options (potentially fuelled from LNG or CNG by truck) in Esperance. For further information on Horizon Power's proposal in Esperance see the link below.

<https://horizonpower.com.au/our-community/projects/esperance-power-project/>

The closure of the current Esperance Power Station will impact EGDC's ability to continue its gas retail business in Esperance from December 2021.

In making any application to connect to the natural gas distribution system in Esperance (Gas Distribution System), the applicant acknowledges and agrees that it is aware of the risk that the supply of natural gas to customers in Esperance may cease from December 2021 and EGDC does not provide any warranty or guarantee that it will continue to offer gas supply to customers who are connected to the Gas Distribution System from December 2021. The applicant agrees that, notwithstanding this risk, it wishes to connect to the Gas Distribution System in order to purchase gas from the date of connection to a date when such gas supply may cease to be offered from December 2021.

Kind regards

Wynand Ferreira
Esperance Area Manager
